STAKEHOLDER DESIGN PRESENTATION

E-Commerce Mobile App Prototype

A polished, end-to-end shopping experience designed to align stakeholders around a clear, testable user interface.

Prototype concept: SHOPLY
Design direction: Premium modern · Light UI
Primary platform: Mobile · 390 × 844 px frame

Prepared for stakeholder discussion and feedback

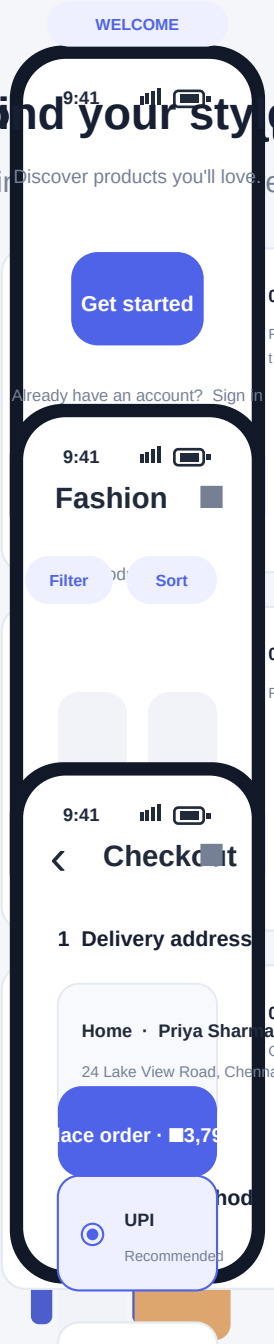

This document contains nine connected screen concepts, a screen overview, interaction intent, and a review checklist. Sample products, prices, customer details and delivery information are illustrative.

WELCOME

Find your style at a glance

Nine screens that discover products you'll love, cover the main customer journey from first visit to post-purchase account management.

01 Welcome & onboarding

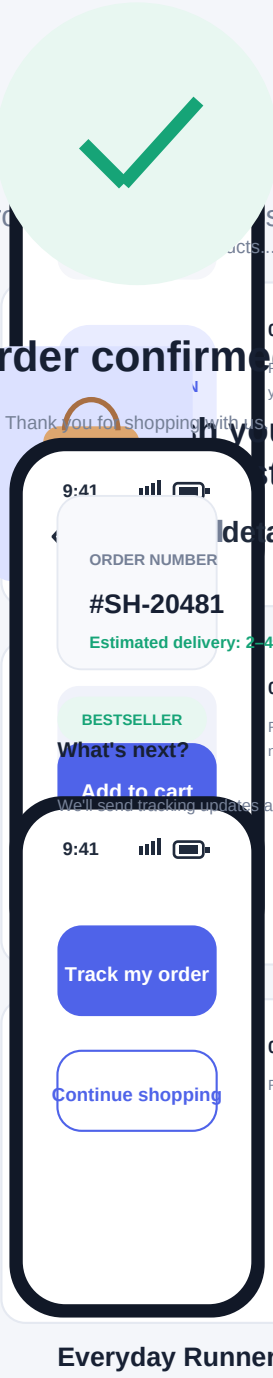

First impression and entry point

02 Home

Promotions and product discovery

03 Categories

Browse by shopping department

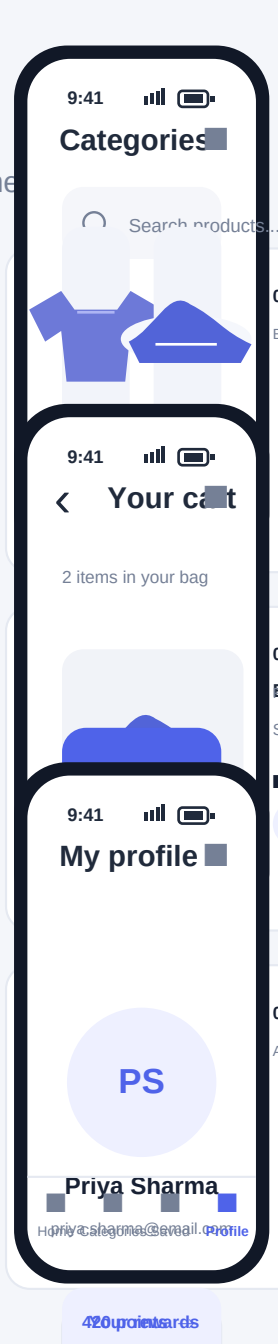

04 Product listing

Filter, sort and compare items

05 Product details

Review product and choose options

06 Shopping cart

07 Checkout

Choose delivery and payment

08 Order confirmed

Reassurance and next action

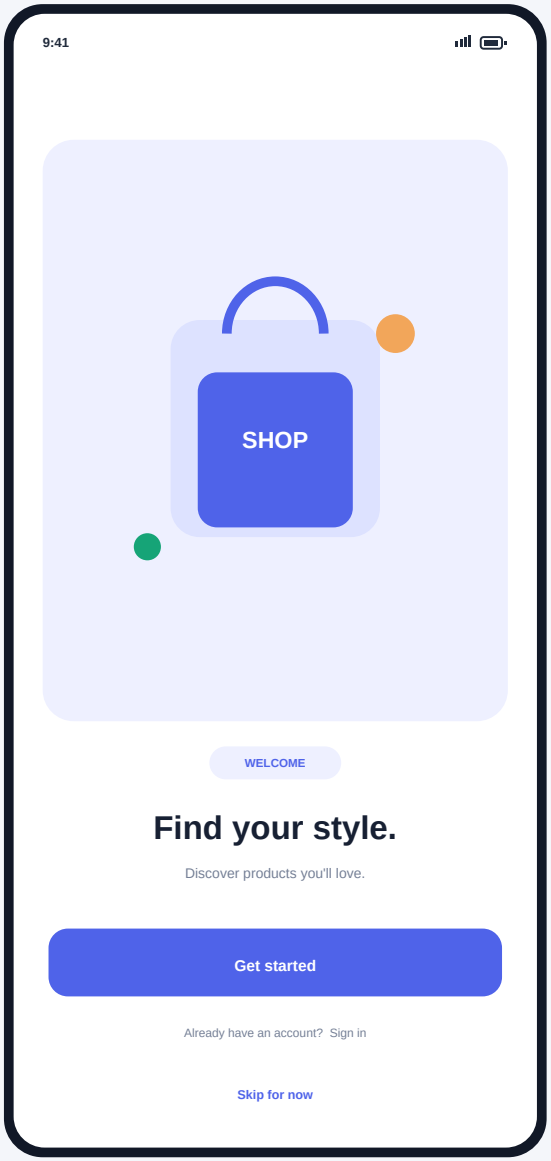

09 Profile & orders

Account and order management

Experience principles: clear hierarchy · recognizable navigation · visible pricing · low-friction checkout · reassuring order confirmation

01 · Welcome & onboarding

Introduce the brand and make the first action obvious.

DESIGN INTENT

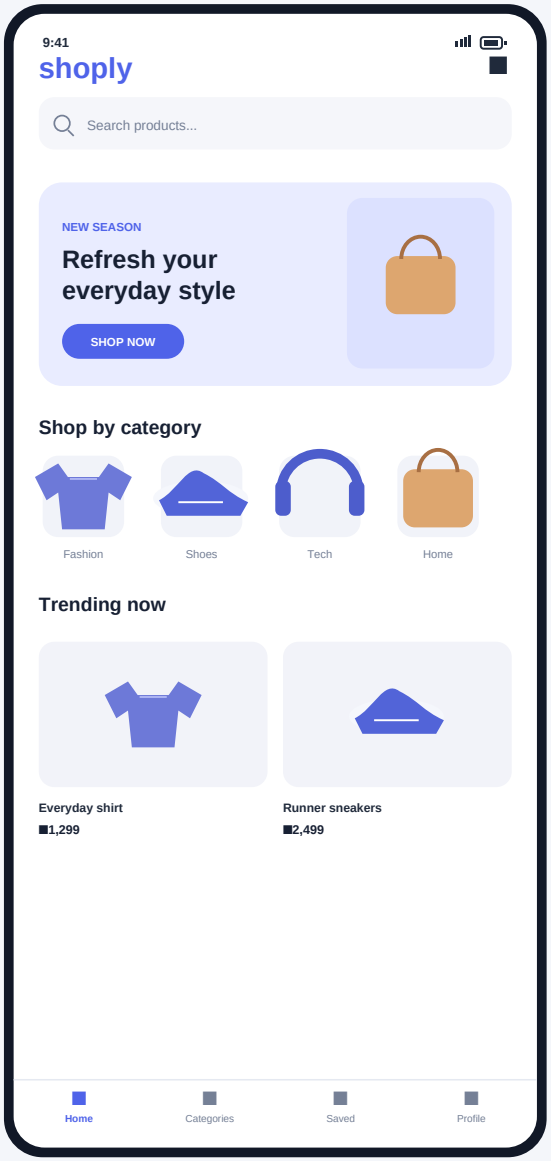

- Builds a clear first impression with one primary call to action.
- Allows returning shoppers to sign in and new shoppers to explore.
- Stakeholder decision: should onboarding include multiple slides or a single welcome screen?

REVIEW PROMPT

Does this screen make the next customer action obvious? What would you change before visual design approval?

02 · Home

Help shoppers discover relevant products quickly.

DESIGN INTENT

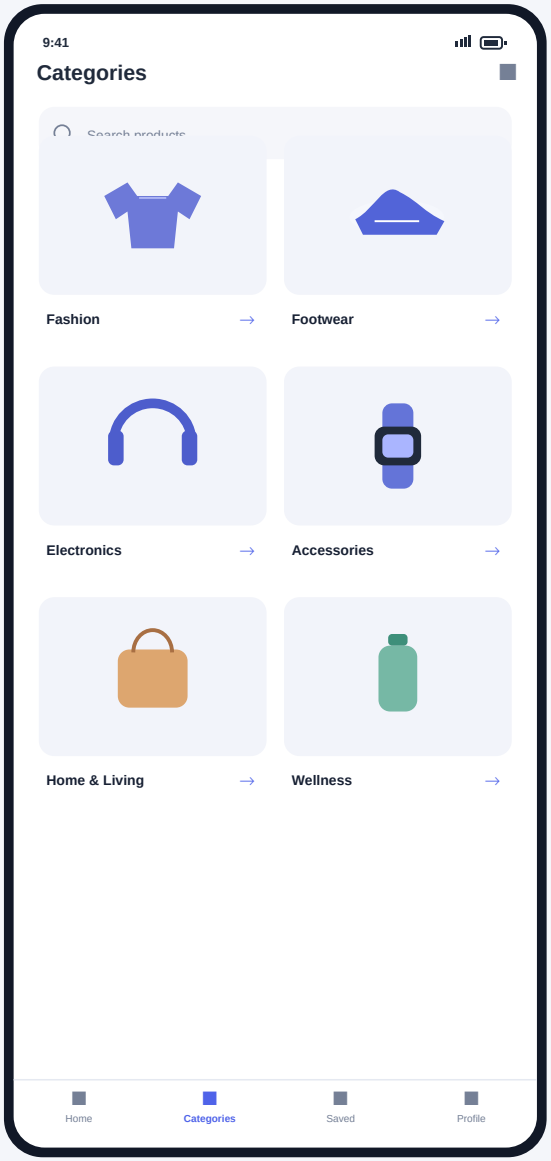

- Combines search, a promotional campaign, categories and trending products.
- Bottom navigation keeps core destinations visible.
- Stakeholder decision: prioritize campaign storytelling or personalized product recommendations?

REVIEW PROMPT

Does this screen make the next customer action obvious? What would you change before visual design approval?

03 · Categories

Make product discovery easy to scan.

DESIGN INTENT

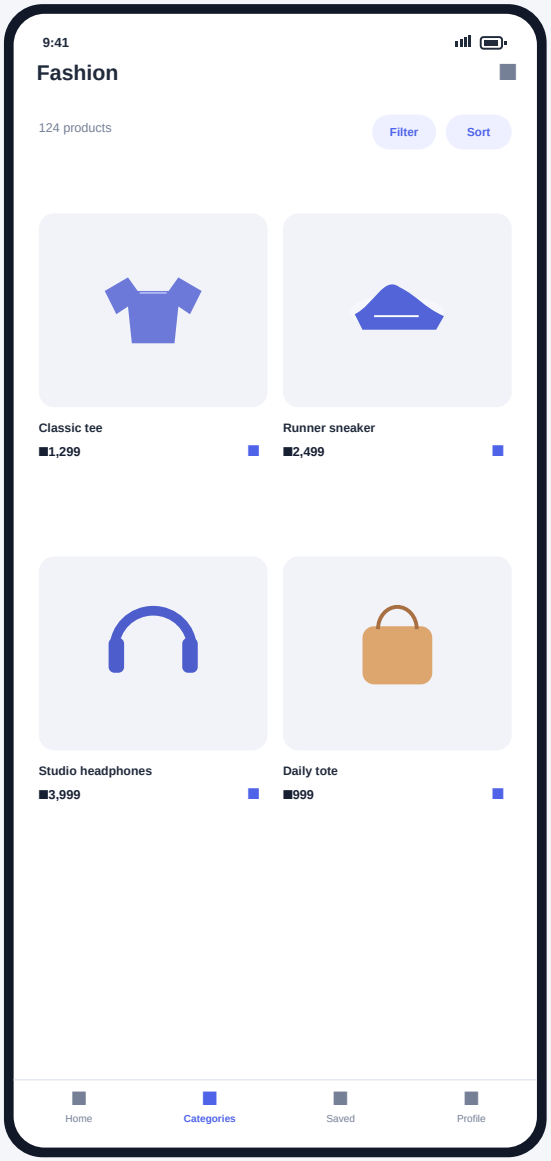

- Uses visual category tiles and a persistent search entry point.
- Two-column layout supports quick browsing across departments.
- Stakeholder decision: use illustrated category tiles or compact text rows?

REVIEW PROMPT

Does this screen make the next customer action obvious? What would you change before visual design approval?

04 · Product listing

Support browsing, comparison and narrowing choices.

DESIGN INTENT

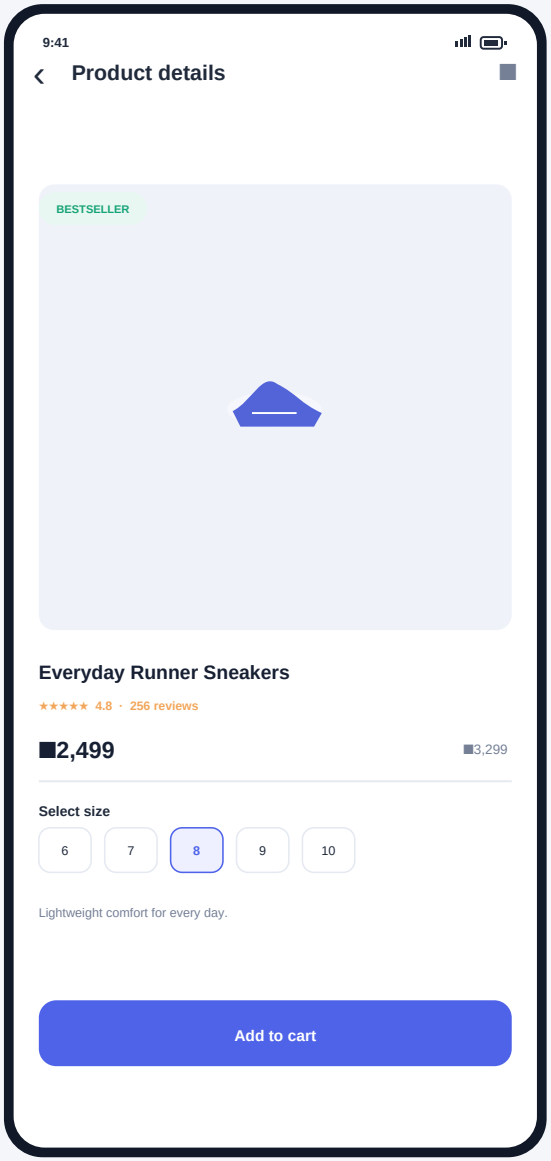

- Product grid shows image, name and price at a glance.
- Filter and sort actions are visible above the results.
- Stakeholder decision: should filters open as a bottom sheet or a full-screen panel?

REVIEW PROMPT

Does this screen make the next customer action obvious? What would you change before visual design approval?

05 · Product details

Give shoppers the information needed to make a confident choice.

DESIGN INTENT

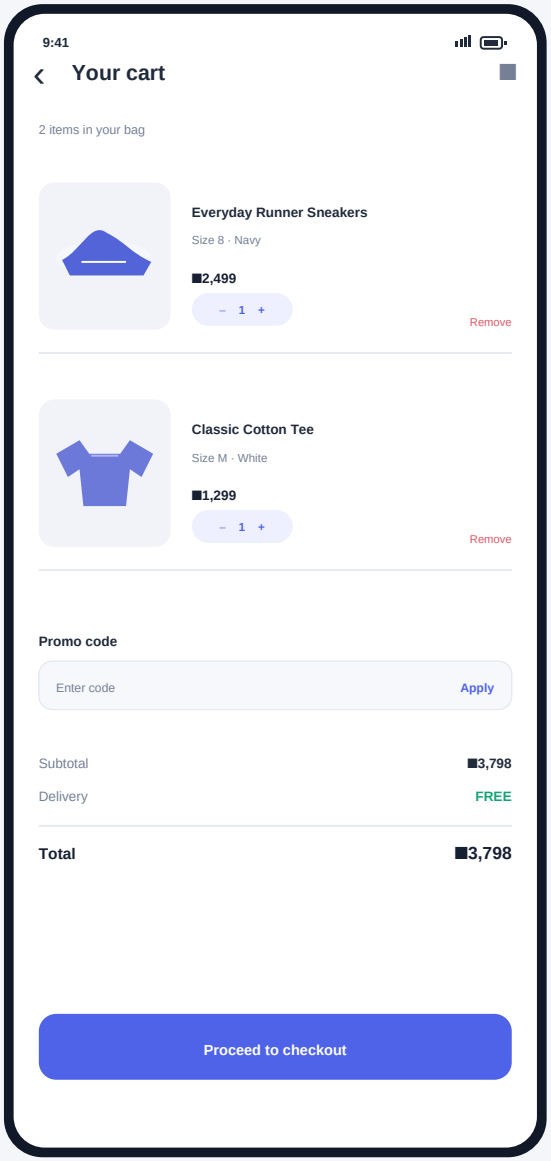

- Prominent product image, reviews, price and size selection.
- Primary Add to cart action remains visually distinct.
- Stakeholder decision: which details are essential above the fold (sizes, colors, delivery, returns)?

REVIEW PROMPT

Does this screen make the next customer action obvious? What would you change before visual design approval?

06 · Shopping cart

Let shoppers review and adjust their order before checkout.

DESIGN INTENT

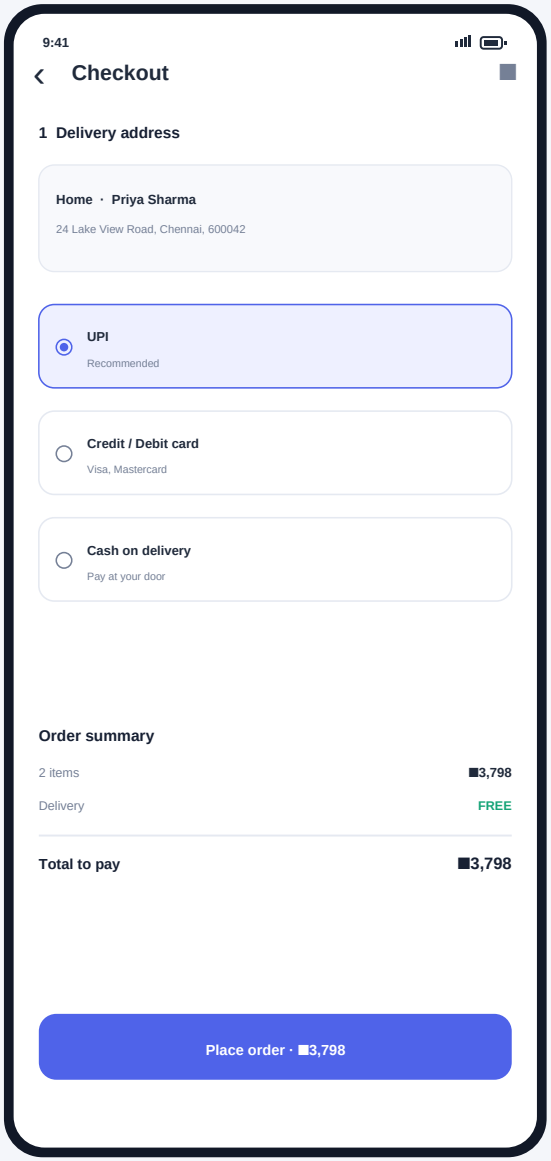

- Displays item options, quantity controls, remove action and promo code.
- Subtotal, delivery and total are separated for transparency.
- Stakeholder decision: should recommendations or free-shipping progress appear in the cart?

REVIEW PROMPT

Does this screen make the next customer action obvious? What would you change before visual design approval?

07 · Checkout

Collect delivery and payment choices with minimal friction.

DESIGN INTENT

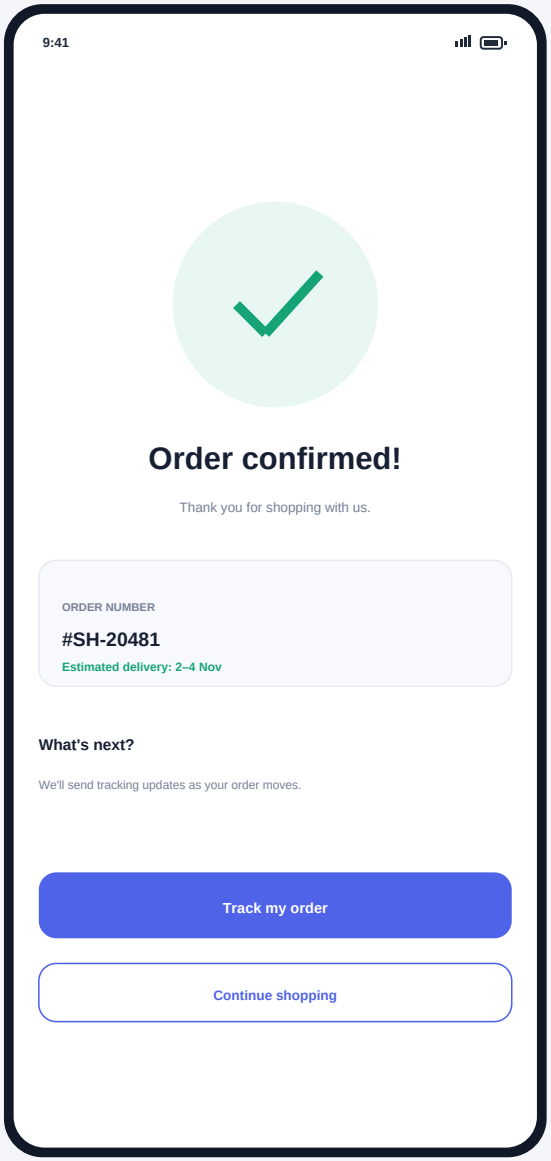

- Separates address, payment method and order summary.
- Highlights a recommended payment option while keeping alternatives visible.
- Stakeholder decision: guest checkout, saved address defaults and payment methods to support?

REVIEW PROMPT

Does this screen make the next customer action obvious? What would you change before visual design approval?

08 · Order confirmed

Reassure customers and explain what happens next.

DESIGN INTENT

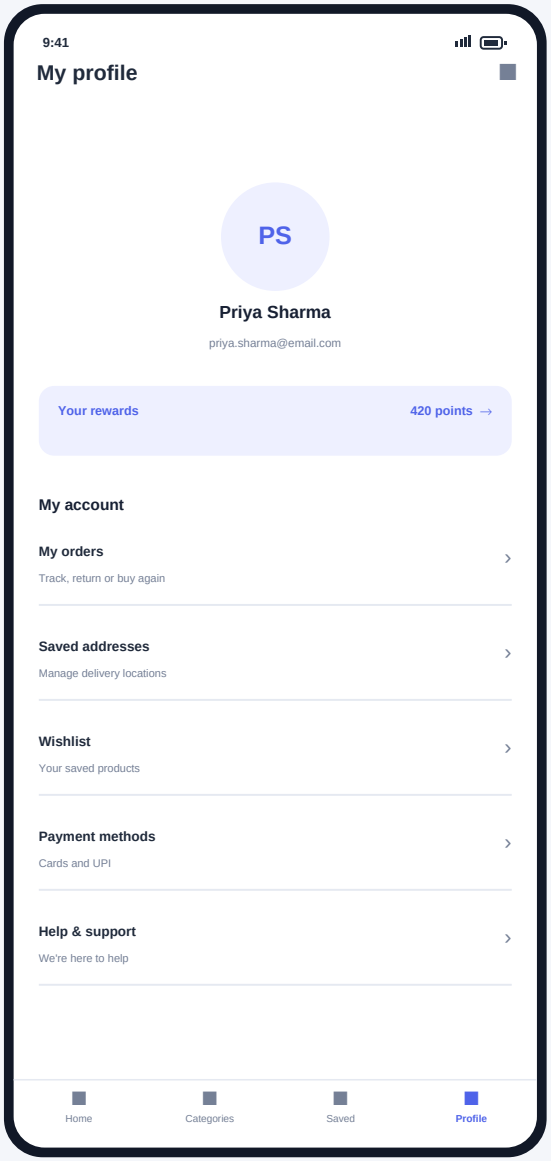

- Uses a clear success state and visible order reference.
- Provides an estimated delivery window and order-tracking action.
- Stakeholder decision: include delivery timeline, support link or continue-shopping action first?

REVIEW PROMPT

Does this screen make the next customer action obvious? What would you change before visual design approval?

09 · Profile & orders

Give customers a dependable place to manage their account.

DESIGN INTENT

- Groups orders, addresses, wishlist, payment methods and support.
- Rewards summary adds a useful account-level touchpoint.
- Stakeholder decision: which account tools are required for the first release?

REVIEW PROMPT

Does this screen make the next customer action obvious? What would you change before visual design approval?

Stakeholder review & approval

Use this page to capture decisions before moving into high-fidelity visual design and development handoff.

AREA	DECISION TO CONFIRM	STAKEHOLDER NOTES
Brand & visual style	Approve SHOPLY concept, color palette, typography and icon style	
Navigation	Confirm bottom navigation destinations and labels	
Discovery	Choose category layout, product grid density and search behavior	
Product details	Confirm required product information, variants and reviews	
Cart & checkout	Confirm promo codes, delivery fees, guest checkout and payment methods	
Post-purchase	Confirm order tracking, notifications and account tools	
Accessibility	Check text contrast, tap-target sizes and readable type	

Approval outcome

■ Approved as presented ■ Approved with changes ■ Rework required

Owners / next steps

Record the agreed changes, responsible owners and target date before the next review.

Prototype scope note: This PDF is a visual concept for stakeholder discussion, not a production-ready or clickable Figma file. The next design step is to recreate the approved screens as editable Figma frames and connect the prototype interactions.
